

of prices in the area, not to mention the fact that the months after the festival, the town council had to spend over £7,000 to clean-up the area and compensate residents who were endangered and troubled by this festival, as it greatly damaged their areas health and disrupted their day to day life. Imagine the consequences of this event when you consider the aforementioned concert and festival was only about 18 hours! Imagine ~~the~~ what would happen after this three-day-straight concert?

Conclusion To conclude, this three day 'fun' festival would most certainly lead to the decline of this peaceful town's economy, lifestyle, and overall way of life. ~~The~~ Anyone still wanting to perform this event is clearly delusional and has no inkling of a clue what this event could really mean for us all.

Yours faithfully,

Salutations  
Dear Editor,

Introduction  
I am writing to you to express my concern regarding the upcoming three-day music festival that will transpire in the grounds of the historic building of our town. I simply do not understand why any one would think that this wasteful event was certainly not 'music' to my ears.

\* and management  
Paragraph 1  
Anecdote  
To begin with, the event as a whole would require many levels of security, if we wanted to create a safe environment. You would want this to be safe, wouldn't you? An example of this kind of event done wrong was a festival and concert two towns over, that had the same plan as us, no less. However, when I made the trek with my friend to go to have a good time, we encountered multiple problems, from the majority of my belongings being stolen, to my friend getting sent to hospital from the symptoms of a cold that were constantly standing up and moving. He had to leave early because of the aforementioned hospital

visit, plus the fact that I just couldn't 'stand' it any longer! So, in regards of the event's security, it would have to really excel to avoid a repeat of a situation as I described. No to mention the fact that this venue will take place on the grounds of a historical building; this alone should require a lot more security. We don't want to ruin or damage our own town's history, do we?

Secondly, the sheer level of pollution, litter, costs and noise pollution that this (three whole days) music festival will cause, will certainly, greatly affect our town and will most ~~definitely~~ create a lasting effect on our economy, and our areas health. You too, would not wish that upon your family, friends and community, would you? The biggest consequence of this festival would definitely be the unbelievable amount of pollution that would be left behind once all is said and done. It would leave a lasting impact on our area that would require a lot of efforts to recover from. All for what? To have three days of music blasted into your ear drums and leave you partially deaf? When does it stop? Even a professor did a study at Cambridge University on the effects of pollution and the results of big events such as festivals and concerts: in which he discovered that there is a 37% increase in CO<sub>2</sub> levels in the area, and a 73% increase in litter concentration. Are you aware of how long it will take for our town to recover from this?

Paragraph 2  
separately  
definitely  
definitely

Great news

Paragraph 3

Paragraph 3  
Now, I know what you will probably be saying: "It will be a good chance to interact with the community and get more tourists, and in turn, money!" And to completely outweigh that, may I remind you of the town I previously stated by (first paragraph/argument) and how ~~me~~ <sup>my friend and I</sup> and my friend were out more for wear, well, apparently that same town has in fact had a 29% decrease in local tourists in the area since the same year the festival was, and a no-less than 42% increase
